EFRA (Ref: MO43) For Weather Forecast Planning Issued on Saturday, 10 August 2024 at 05:31 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels are expected to be Low. This is due to a mixture of breezy conditions across northern parts of the UK, along with outbreaks of rain and some drizzle further south, helping to prevent the build-up of pollutants.

Tomorrow: Low levels of air pollution are expected to continue on Sunday, with the breeze helping to disperse any pollutants.

Outlook: Areas of Moderate air pollution have the potential to develop across eastern England on Monday, associated with the hot and humid weather. Otherwise Low levels of air pollution are expected.
